

# DO YOU KNOW ABOUT OUR FORK TRUCK FLEET?

Team Transport have a fleet of trucks with forklifts mounted on the rear of the trailer. Fork-mounted vehicles provide you with an end-to-end transport solution, with one vehicle and driver to load the vehicle at pick-up, transport and unload on site. This means that you don't have to organise on-site loading/unloading facilities!

Our fleet of body fork trucks and semi-trailer forks carry up to 22 tonne with a fork-lift capacity of 1.7tonne. These trucks are ideal for transporting and lifting tiles, scaffold, bricks, masonry and any palletised load.

Our forklifts are suitable for rough terrain and have fewer restrictions regarding access requirements than crane trucks. Try out our fork fleet; you'll be amazed at the convenience, cost efficiency and flexibility they can offer your company!

**“FORK-MOUNTED VEHICLES PROVIDE YOU WITH AN END-TO-END TRANSPORT SOLUTION [FROM PICKUP TO DELIVERY].”**
