

ENVIRONMENTAL POLICY

This policy is to be used to develop staff awareness, knowledge, skill and capabilities of environmental management issues.

Team Transport and Logistics is committed to understanding and minimising any adverse environmental impacts of our operations while endeavoring to meet and exceed the expectations of our customers and maintaining a safe working environment for all parties involved with our organisation.

The aim is to achieve a sustainable balance between environmental protection and economic development that is in the interest of future generations.

Team Transport and Logistics is committed to achieving set standards and our policy consists of a series of guarantees that set the standards we expect to achieve including:

To provide the necessary training to minimise adverse environmental impacts and issues.

- Complying with environmental legislation, regulations, standards and codes of practice relevant to the particular business as the absolute minimum requirement in the community in which we operate
- To include environmental considerations in all business planning and risk management;
- To implement procedures and checklists to verify and review our company's environmental performance;
- To ensure our vehicle emissions remain within environmental standards and our maintenance program will actively support these standards;
- To consider the environmental impact of the services we provide and to promote environmental awareness amongst our suppliers and service providers;
- To reduce, re-use and recycle waste products wherever practicable; and
- To continually seek efficiencies in the use of resources, including energy, chemicals, water, packaging and raw materials.
- Conducting business with suppliers and contractors who have a commitment to the values and objectives contained in this environmental policy
- Efficient use of energy (including appropriate use of alternative fuels)
- Conservation of water
- Minimisation and recycling of wastes
- Prevention of pollution
- Reducing the greenhouse gas emissions from our operations and facilities
